

Safer E-mail

You are at risk when you are online. Many email attachments can unleash destructive and malicious code. New Internet borne threats are appearing daily — you need the strongest possible safeguards. Home users and businesses trust their computers to Firetrust Limited, makers of Benign software and the popular MailWasher Pro software giving you the highest levels of protection possible. With Firetrust, whenever you are online, you are protected.

Firetrust Benign has been uniquely designed to neutralize harmful aspects of e-mail such as viruses, scripts and web bugs, so e-mail received is safe. Benign is simple to use, quick to download and contains many innovative features. The program automatically detects and strips out the code, which makes viruses, worms, scripts and other potentially harmful nasties run, producing safer e-mail. Benign is an ideal first line of defense.

- File size: 1.3 MB. Download Time: 3 mins @ 56kbps

Product Need

- Most viruses enter computers through e-mail
- Privacy is compromised through use of such things as web bugs, html and external images
- Due to the constant development and release of new viruses, conventional anti-virus software needs to be continually updated in order to be effective
- Even with the latest updates, some viruses will remain undetected by the best anti-virus software

Benefits

- Makes e-mail safe
- Stops virus replication
- Avoids costs associated with viruses
- Easy to use
- Completely customizable

Firetrust is a privately held company, established in 2000 to provide world-class e-mail security products for business and home users. Firetrust provides solutions across the spectrum of inbox protection, including MailWasher Pro for unsolicited commercial e-mail (spam) and Benign to neutralize harmful email, which can contain viruses, worms, scripts and web bugs. The company is headquartered in Christchurch, New Zealand. To date MailWasher has had more than 3 million downloads.
